

HEDIS Category II coding tips

The following CPT® Category II codes can help reduce the number of medical records we request during HEDIS® medical record review season (January to May each year). Adding these codes to a claim will help us identify additional information about the visit and improve the accuracy of reporting quality measures.

Prenatal and postpartum care

Initial prenatal care visit	0500F — Initial prenatal care visit (Report at first prenatal encounter with healthcare professional providing obstetrical care. Report also date of visit and, in a separate field, the date of the last menstrual period LMP.) (Prenatal) or 0501F — Prenatal flow sheet documented in medical record by first prenatal visit (documentation includes at minimum blood pressure, weight, urine protein, uterine size, fetal heart tones, and estimated date of delivery). Report also date of visit and, in a separate field, the date of the LMP. (Note: If reporting 0501F Prenatal flow sheet, it is not necessary to report 0500F Initial prenatal care visit.) (Prenatal)
Subsequent prenatal care visit	0502F
Postpartum care visit	0503F — Make sure it is on or between 7 and 84 days of delivery.
