Healthy Blue is a Medicaid product offered by Missouri Care, Inc., a MO HealthNet Managed Care health plan contracting with the Missouri Department of Social Services. Healthy Blue is administered statewide by Missouri Care, Inc. and administered in the Kansas City service region by Missouri Care, Inc. in cooperation with Blue Cross and Blue Shield of Kansas City. Missouri Care, Inc. and Blue Cross and Blue Shield of Kansas City are both independent licensees of the Blue Cross Blue Shield Association.

Healthy Blue HEDIS ECDS Coding Booklet Page 2 of 96 Our Supplemental Data Team is here to help. For additional support in submitting supplemental data for ECDS measures, please send inquiries to supplementaldata@healthybluemo.com.

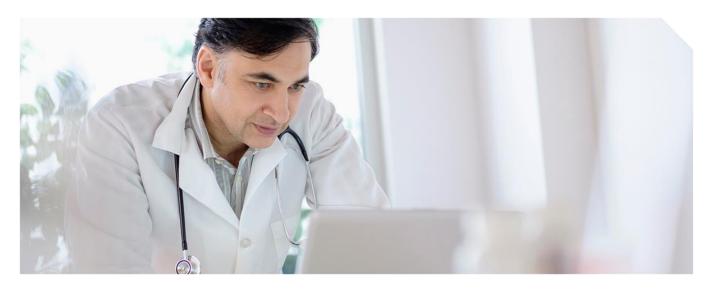

Electronic Clinical Data Systems

HEDIS® (Healthcare Effectiveness Data Information Set) is a widely used set of performance measures developed and maintained by NCQA. These are used to drive improvement efforts surrounding best practices.

The HEDIS quality measures reported using the Electronic Clinical Data Systems (ECDS) inspire innovative use of electronic clinical data to document high-quality patient care that demonstrates commitment to evidence-based practices. Organizations that report HEDIS using ECDS encourage the electronic exchange of the information needed to provide high-quality services, ensuring that the information reaches the right people at the right time:

- ECDS reporting is part of the National Committee for Quality Assurance's (NCQA) larger strategy to enable a digital quality system and is aligned with the industry's move to digital measures.
- The ECDS reporting standard provides a method to collect and report structured electronic clinical data for HEDIS quality measurement and improvement.
- According to the NCQA, the HEDIS hybrid data collection (medical record collection) will be phased-out in the coming years.
- Health plans and healthcare providers will need to take advantage of electronic data streams to ensure accurate reporting of measures that require data not typically found in claims.
- CPT® Category II codes can be used for performance measurement. The use of the CPT II decreases the need for record abstraction and chart review.
- CVX codes (vaccine administered code set) represent the type of product used in an
 immunization. Every immunization that used a given type of product will have the same CVX,
 regardless of who received it.
- Logical Observation Identifiers Names and Codes (LOINC) and SNOMED codes (supports the
 development of comprehensive high-quality clinical content in electronic health records) do not
 appear on claims and are quickly becoming vital to HEDIS reporting, especially for ECDS
 measures:
 - LOINC codes while typically associated with lab data, there are several behavioral health screenings that can only be represented by LOINC codes for the purposes of HEDIS reporting and can be extracted from electronic medical record (EMR) systems.
 - SNOMED codes represent both diagnoses and procedures as well as clinical findings.
 SNOMED codes are the industry standard for classifying clinical data in EMR systems and can be extracted from EMR systems.
 - Because LOINC codes and SNOMED CT codes can only be obtained through supplemental data feeds, it is important that health plans and the provider community embrace the sharing of these EMR data to ensure the quality of care our members are receiving.

Helpful tips:

- Utilize this booklet as a reference to understand the ECDS measures and the coding associated with electronic data transmission.
- Contact your health plan representative to establish an electronic data transfer with the plan if your organization does not already have one.
- Make full use of CPT II codes to submit care quality findings, many HEDIS gaps could be closed via claims if CPT II codes were fully utilized.
- Ensure the EMR systems are set up to link the clinical and behavior health entries to LOINC codes and SNOMED codes:

Ensure that the extracts are inclusive of LOINC codes for BH screenings among other things and SNOMED codes.

Notes:			

Follow-Up Care for Children Prescribed ADHD Medication (ADD-E)

This measure looks at the percentage of children ages 6 to 12 newly prescribed attention-deficit/hyperactivity disorder (ADHD) medication who had at least three follow-up care visits within a 10-month period, one of which was within 30 days of when the first ADHD medication was dispensed during the measurement year.

Two rates are reported:

• Initiation phase: the percentage of members 6 to 12 years of age with a prescription dispensed for ADHD medication, who had one follow-up visit with a practitioner with prescribing authority during the 30-day initiation phase

• Continuation and maintenance (C&M) phase: the percentage of members 6 to 12 years of age with a prescription dispensed for ADHD medication, who remained on the medication for at least 210 days and who, in addition to the visit in the Initiation Phase, had at least two follow-up visits with a practitioner within 270 days (nine months) after the initiation phase ended.

Record your efforts

When prescribing a new ADHD medication:

- Be sure to schedule a follow-up visit right away within 30 days of ADHD medication initially prescribed or restarted after a 120-day break.
- Schedule follow-up visits while members are still in the office.
- Have your office staff call members at least three days before appointments.
- After the initial follow-up visits, schedule at least two more office visits in the next nine months to monitor patient's progress.
- Be sure that follow-up visits include the diagnosis of ADHD.

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.
- Members with a diagnosis of narcolepsy any time during the member's history through the end of the measurement period.

Notes:				

Adult Immunization Status (AIS-E)

This measure looks at the percentage of members 19 years of age and older who are up to date on recommended routine vaccines for influenza, tetanus, and diphtheria (Td) or tetanus, diphtheria, and acellular pertussis (Tdap), zoster and pneumococcal during the measurement year.

Record your efforts

Document the required age vaccines were received according to the time interval specified in the measure:

- Members who received an influenza vaccine on or between July 1 of the year prior to the measurement period and June 30 of the measurement period
- Members who received at least one Td vaccine or one Tdap vaccine between nine years prior to the start of the measurement period and the end of the measurement period

or

- Members with a history of at least one of the following contraindications any time before or during the measurement period:
 - o Anaphylaxis due to the diphtheria, tetanus, or pertussis vaccine.
 - o Encephalitis due to the diphtheria, tetanus, or pertussis vaccine.
- Members who received at least one dose of the herpes zoster live vaccine or two doses of the herpes zoster recombinant vaccine at least 28 days apart, any time on or after the member's 50th birthday and before or during the measurement period
- Members who were administered the 23-valent pneumococcal polysaccharide vaccine on or after the member's 60th birthday and before or during the measurement period

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.

Notes:			

Metabolic Monitoring for Children and Adolescents on Antipsychotics (APM-E)

This measure looks at the percentage of children and adolescents 1 to 17 years of age who had two or more antipsychotic prescriptions and had metabolic testing during the measurement year. Three rates are reported:

- The percentage of children and adolescents on antipsychotics who received blood glucose testing (blood glucose or HbA1c)
- The percentage of children and adolescents on antipsychotics who received cholesterol testing (LDL-C or cholesterol)
- The percentage of children and adolescents on antipsychotics who received both blood glucose and cholesterol testing.

Record your efforts:

- Members who received at least one test for blood glucose or HbA1c
- Members who received at least one test for LDL-C or cholesterol
- Members who received both of the following on the same or different dates:
 - o At least one test for blood glucose or HbA1c
 - At least one test for LDL-C or cholesterol

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.

Notes:			

Unhealthy Alcohol Use Screening and Follow-Up (ASF-E)

This measure looks at the percentage of members 18 years of age and older who were screened for unhealthy alcohol use using a standardized instrument and, if screened positive, received appropriate follow-up care during the measurement year.

Unhealthy Alcohol Use Screening. The percentage of members who had a systematic screening for unhealthy alcohol use.

Follow-Up Care on Positive Screen. The percentage of members receiving brief counseling or other follow-up care within 60 days (2 months) of screening positive for unhealthy alcohol use.

Record your efforts

A standard assessment instrument that has been normalized and validated for the adult patient population to include *AUDIT*, *AUDIT-C*, and a *Single-Question Screen*. Screening requires completion of one or more instruments. The threshold for a positive finding is indicated below for each instrument:

Screening instrument	Total Score — LOINC Codes	Positive finding
Alcohol Use Disorders Identification Test (AUDIT) Screening Instrument	75624-7	Total score ≥ 8
Alcohol Use Disorders Identification Test Consumption (AUDIT-C) Screening Instrument	75626-2	Total score ≥ 4 for men Total score ≥ 3 for women
Single-question screen (for men): "How many times in the past year have you had 5 or more drinks in a day?"	88037-7	Response ≥1
Single-question screen (for women and all adults older than 65 years): "How many times in the past year have you had 4 or more drinks in a day?"	75889-6	Response ≥1

Any of the following on or up to 60 days after the first positive screen:

- Feedback on alcohol use and harms
- Identification of high-risk situations for drinking and coping strategies
- Increase the motivation to reduce drinking
- Development of a personal plan to reduce drinking
- Documentation of receiving alcohol misuse treatment

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.
- Members with alcohol use disorder that starts during the year prior to the measurement period.
- Members with history of dementia any time during the member's history through the end of the measurement period.

Breast Cancer Screening (BCS-E)

This HEDIS measure looks at members 50 to 74 years of age who were recommended for routine breast cancer screening and had a mammogram to screen for breast cancer from October 1, two years prior to the measurement period through the end of the measurement period.

Record your efforts

Include documentation of all types and methods of mammograms including:

- Screening
- Diagnostic
- Film
- Digital
- Digital breast tomosynthesis

In establishing health history with new members, please make sure you ask about when members last mammogram was performed, document at a minimum, year performed in your health history.

Gaps in care are not closed by the following, as they are performed as an adjunct to mammography:

- Breast ultrasounds
- MRIs
- Biopsies

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.
- Members who had a bilateral mastectomy or both right and left unilateral mastectomies any time during the member's history through the end of the measurement period.
- Members who had gender-affirming chest surgery with a diagnosis of gender dysphoria any time during the member's history through the end of the measurement period.
- Members 66 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Members must meet **both** frailty and advanced illness criteria to be excluded.
- Members who die any time during the measurement year
- Members receiving palliative care any time during the measurement year.
- Members who had an encounter for palliative anytime during the measurement year.

	4	

Cervical Cancer Screening (CCS-E)

This measure looks at the percentage of members 21 to 64 years of age who were recommended for routine cervical cancer screening and were screened for cervical cancer using any of the following criteria:

- Members 21 to 64 years of age who were recommended for routine cervical cancer screening and had cervical cytology performed within the last 3 years.
- Members 30 to 64 years of age who were recommended for routine cervical cancer screening and had cervical high-risk human papillomavirus (hrHPV) testing performed within the last 5 years.
- Members 30 to 64 years of age who were recommended for routine cervical cancer screening and had cervical cytology/high-risk human papillomavirus (hrHPV) cotesting within the last 5 years.

Record your efforts

Make sure your medical records reflect:

- The date when the cervical cytology was performed.
- The results or findings
- Notes in patient's chart if patient has a history of hysterectomy:
 - Complete details if it was a complete, total, or radical abdominal, vaginal, or unspecified hysterectomy with no residual cervix; also, document history of cervical agenesis or acquired absence of cervix. Include, at a minimum, the year the surgical procedure was performed.

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.
- Hysterectomy with no residual cervix any time during the member's history through December 31 of the measurement year
- Cervical agenesis or acquired absence of cervix any time during the member's history through the end of the measurement period.
- Members receiving palliative care any time during the measurement period.
- Members who had an encounter for palliative care any time during the measurement period.
- Members with Sex Assigned at Birth of Male at any time during the patient's history.

Notes:			

Childhood Immunization Status (CIS-E)

The percentage of children turning 2 years of age who had who had appropriate doses of the following vaccines on or before their 2nd birthday:

- 4 diphtheria, tetanus, and acellular pertussis, *DTaP* vaccine
- 3 polio, *IPV* vaccine
- 1 measles, mumps and rubella, *MMR* vaccine (can only be given on or between first and second birthday to close the gap)
- 3 haemophilus influenza type B, *Hib* vaccine
- 3 hepatitis B, *HepB* vaccine (One of the three vaccinations can be a newborn hepatitis B vaccination during the eight-day period that begins on the date of birth and ends seven days after the date of birth.)
- 1 chicken pox, *VZV* vaccine (can only be given on or between first and second birthday to close the gap)
- 4 pneumococcal conjugate, *PCV* vaccine
- 1 hepatitis A, *HepA* vaccine (can only be given on or between first and second birthday to close the gap)
- 2 two-dose rotavirus, *RV* vaccine, or 3 three-dose rotavirus (RV) (Or one two-dose and two three-dose RV combination)
- 2 influenza, *Flu* vaccine (influenza cannot be given until infant is 6 months of age One of the two vaccinations for influenza can be an LAIV administered on the child's second birthday).

Record your efforts

Once you give our members their needed immunizations, let us and the state know by:

- Recording the immunizations in your state registry.
- Documenting the immunizations (historic and current) within medical records to include:
 - o A note indicating the name of the specific antigen and the date of the immunization.
 - o The certificate of immunization prepared by an authorized healthcare provider or agency.
 - Parent refusal, documented history of anaphylactic reaction to serum/vaccinations, illnesses, or seropositive test result.
 - The date of the first hepatitis B vaccine given at the hospital and name of the hospital if available.
 - A note that the *member is up to date* with all immunizations but does not list the dates of all immunizations and the names of the immunization agents does not constitute sufficient evidence of immunization for HEDIS reporting.

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.
- Members who had a contraindication to a childhood vaccine on or before their second birthday.

Colorectal Cancer Screening (COL-E)

This measure looks at the percentage of members 45 to 75 years of age who had appropriate screening for colorectal cancer.

Record your efforts

- Members with one or more screenings for colorectal cancer. Any of the following meet criteria:
 - o Fecal occult blood test (FOBT) during the measurement period
 - Flexible sigmoidoscopy during the measurement period or the four years prior to the measurement period
 - Colonoscopy during the measurement period or the nine years prior to the measurement period
 - CT colonography during the measurement period or the four years prior to the measurement period
 - Stool DNA (sDNA) with fecal immunochemical test (FIT) test during the measurement period or the two years prior to the measurement period

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.
- Members 66 years of age and older as of December 31 of the measurement year (all product lines) with frailty and advanced illness. Members must meet **both** frailty and advanced illness criteria to be excluded.
- Members receiving palliative care any time during the measurement year.
- Members who had an encounter for palliative care any time during the measurement year.
- Members who had colorectal cancer any time during the member's history through December 31 of the measurement year.
- Members who had a total colectomy any time during the member's history through December 31 of the measurement period.

Notes:			

Utilization of the *PHQ-9* to Monitor Depression Symptoms for Adolescents and Adults (DMS-E)

This measure looks at the percentage of members 12 years of age and older with a diagnosis of major depression or dysthymia who had an outpatient encounter with a *Patient Health Questionnaire-9 (PHQ-9)* score present in their record in the same assessment period as the encounter.

Record your efforts

The identifiers and descriptors for each organization's coverage used to define members' eligibility for measure reporting. Allocation for reporting is based on eligibility during the participation period. The measurement period is divided into three assessment periods with specific dates of service:

- Assessment Period 1: January 1 to April 30
- Assessment Period 2: May 1 to August 31
- Assessment Period 3: September 1 to December 31

The measure allows the use of two *PHQ-9* assessments. Selection of the appropriate assessment should be based on the member's age:

- *PHQ-9*: 12 years of age and older
- PHQ-9 Modified for Teens: 12 to 17 years of age

The *PHQ-9* assessment does not need to occur during a face-to-face encounter; it may be completed over the telephone or through a web-based portal.

- Members with any of the following at any time during member's history through the end measurement period:
 - Bipolar disorder
 - o Personality disorder
 - Psychotic disorder
 - o Pervasive developmental disorder
- Members who use hospice services or elect to use a hospice benefit any time during the measurement period.
- Members who die any time during the measurement year.

Notes:			

Depression Remission or Response for Adolescents and Adults (DRR-E)

This measure looks at the percentage of members 12 years of age and older with a diagnosis of depression and an elevated PHQ-9 score, who had evidence of response or remission within 120 to 240 days (4 to 8 months) of the elevated score during the measurement year.

Follow-Up PHQ-9. The percentage of members who have a follow-up PHQ-9 score documented within 120 to 240 days (4 to 8 months) after the initial elevated PHQ-9 score.

Depression Remission. The percentage of members who achieved remission within 120 to 240 days (4 to 8 months) after the initial elevated PHQ-9 score.

Depression Response. The percentage of members who showed response within 120 to 240 days (4 to 8 months) after the initial elevated PHQ-9 score.

Record your efforts

The identifiers and descriptors for each organization's coverage used to define members' eligibility for measure reporting. Allocation for reporting is based on eligibility during the participation period:

- May 1 of the year prior to the measurement period through December 31 of the measurement period
- May 1 of the year prior to the measurement period through April 30 of the measurement period
- The 120- to 240-day period after the index episode start date.
- Index episode start date: The earliest date during the intake period where a member has a diagnosis of major depression or dysthymia *and* a *PHQ-9* total score > 9 documented.

The measure allows the use of two *PHQ-9* assessments. Selection of the appropriate assessment should be based on the member's age:

- PHQ-9: 12 years of age and older
- PHQ-9 Modified for Teens: 12 to 17 years of age

The *PHQ-9* assessment does not need to occur during a face-to-face encounter; it may be completed over the telephone or through a web-based portal.

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.
- Members with any of the following any time during the member's history through the end of the measurement period:
 - Bipolar disorder
 - Personality disorder
 - o Psychotic disorder
 - Pervasive developmental disorder

Notes:			

Depression Screening and Follow-Up for Adolescents and Adults (DSF-E)

This measure looks at the percentage of members 12 years of age and older who were screened for clinical depression using a standardized instrument and, if screened positive, received follow-up care during the measurement year:

- **Depression Screening.** The percentage of members who were screened for clinical depression using a standardized instrument.
- **Follow-Up on Positive Screen**. The percentage of members who received follow-up care within 30 days of a positive depression screen finding.

Record your efforts

The identifiers and descriptors for each organization's coverage used to define members' eligibility for measure reporting. Allocation for HEDIS reporting is based on eligibility during the participation period.

This measure requires the use of an age-appropriate screening instrument. The member's age is used to select the appropriate depression screening instrument.

Depression screening instrument:

• A standard assessment instrument that has been normalized and validated for the appropriate patient population. Eligible screening instruments with thresholds for positive findings include:

Instruments for adolescents (≤ 17	Total Score — LOINC	Positive finding
years)	Codes	
Patient Health Questionnaire (PHQ-9)®	44261-6	Total score ≥ 10
Patient Health Questionnaire Modified for Teens (PHQ- 9M)®	89204-2	Total score ≥ 10
Patient Health Questionnaire-2 (PHQ-2)®1	55758-7	Total score ≥ 3
Beck Depression Inventory-Fast Screen (BDI-FS)®1, 2	89208-3	Total score ≥ 8
Center for Epidemiologic Studies Depression Scale — Revised (CESD-R)	89205-9	Total score ≥ 17
Edinburgh Postnatal Depression Scale (EPDS)	71354-5	Total score ≥ 10
PROMIS Depression	71965-8	Total score (T score) ≥ 60

¹ Brief screening instrument. All other instruments are full-length.

² Proprietary; may be cost or licensing requirement associated with use.

Instruments for adults (18+ years)	Total Score — LOINC Codes	Positive finding
Patient Health Questionnaire (PHQ-9)®	44261-6	Total score ≥ 10
Patient Health Questionnaire-2 (PHQ-2)®1	55758-7	Total score ≥ 3
Beck Depression Inventory-Fast Screen (BDI-FS)®1, 2	89208-3	Total score ≥ 8

Instruments for adults (18+ years)	Total Score — LOINC Codes	Positive finding
Beck Depression Inventory (BDI-II)	89209-1	Total score ≥ 20
Center for Epidemiologic Studies Depression Scale- Revised (CESD-R)	89205-9	Total score ≥ 17
Duke Anxiety-Depression Scale (DUKE-AD)®2	90853-3	Total score ≥ 30
Geriatric Depression Scale Short Form (GDS) ¹	48545-8	Total score ≥ 5
Geriatric Depression Scale Long Form (GDS)	48544-1	Total score ≥ 10
Edinburgh Postnatal Depression Scale (EPDS)	48544-1	Total score ≥ 10
My Mood Monitor (M-3)®	71777-7	Total score ≥ 5
PROMIS Depression	71965-8	Total score (T score) ≥ 60
Clinically Useful Depression Outcome Scale (CUDOS)	90221-3	Total score ≥ 31

¹ Brief screening instrument. All other instruments are full-length.

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.
- Members with a history of bipolar any time during the member's history through the end of the year prior to the measurement period.
- Members with depression that starts during the year prior to the measurement period.

Notes:				
	_	_	 	•

² Proprietary; may be cost or licensing requirement associated with use.

Immunizations for Adolescents (IMA-E)

This measure reviews members 13 years of age who had one dose of meningococcal vaccine, one tetanus, diphtheria toxoids and acellular pertussis (Tdap) vaccine, and have completed the human papillomavirus (HPV) vaccine series by their 13th birthday. The measure calculates a rate for each vaccine and two combination rates.

Vaccines administered on or before their 13th birthday:

 One MCV/meningococcal vaccine on or between 11th and 13th birthdays, and one Tdap or one Td vaccine on or between their 10th and 13th birthdays

- At least two doses of HPV vaccine with DOS at 146 days apart on or between the 9th and 13th birthdays:
 - Or at least three HPV vaccines with different dates of service on or between the 9th and 13th birthdays

Record your efforts

Immunization information obtained from the medical record:

- A note indicating the name of the specific antigen and the date of the immunization
- A certificate of immunization prepared by an authorized healthcare provider or agency, including the specific dates and types of immunizations administered
- Document in the medical record parent or guardian refusal

Two-dose HPV vaccination series:

• There must be at least 146 days between the first and second dose of the HPV vaccine.

Meningococcal:

• **Do not count** meningococcal recombinant (serogroup B) (MenB) vaccines.

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.

Notes:			

Postpartum Depression Screening and Follow-Up (PDS-E)

This measure assesses the percentage of deliveries in which members were screened for clinical depression during the postpartum period, and if screened positive, received follow-up care during the measurement year:

- **Depression Screening** The percentage of deliveries in which members were screened for clinical depression using a standardized instrument during the postpartum period (7–84 days following the delivery date).
- **Follow-Up on Positive Screen.** The percentage of deliveries in which members received follow-up care within 30 days of a positive depression screen finding (31 total days).

Record your efforts

The identifiers and descriptors for each organization's coverage used to define members' eligibility for measure reporting. Allocation for reporting is based on eligibility during the participation period:

• The delivery date through 60 days following the date of delivery

A standard assessment instrument that has been normalized and validated for the appropriate patient

population. Eligible screening instruments with thresholds for positive findings include:

Instruments for adolescents (≤ 17 years)	Total Score	Positive finding
	LOINC Codes	
Patient Health Questionnaire (PHQ-9)®	44261-6	Total score ≥ 10
Patient Health Questionnaire Modified for	89204-2	Total score ≥ 10
Teens (PHQ-9M)®		
Patient Health Questionnaire-2 (PHQ-2)®1	55758-7	Total score ≥ 3
Beck Depression Inventory-Fast Screen (BDI-FS)®1, 2	89208-3	Total score ≥ 8
Center for Epidemiologic Studies Depression Scale-Revised (CESD-R)	89205-9	Total score ≥ 17
Edinburgh Postnatal Depression Scale (EPDS)	71354-5	Total score ≥ 10

Instruments for adults (18+ years)	Total Score LOINC Codes	Positive finding
PROMIS Depression	71965-8	Total score (T score) ≥ 60
Clinically Useful Depression Outcome Scale (CUDOS)	90221-3	Total score ≥ 31

¹ Brief screening instrument. All other instruments are full-length.

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.

Notes:			

² Proprietary; may be cost or licensing requirement associated with use.

Prenatal Depression Screening and Follow-up (PND-E)

This measure assesses the percentage of deliveries in which members were screened for clinical depression while pregnant and, if screened positive, received follow-up care during the measurement year:

- **Depression Screening.** The percentage of deliveries in which members were screened for clinical depression during pregnancy using a standardized instrument.
- **Follow-Up on Positive Screen**. The percentage of deliveries in which members received follow-up care within 30 days of a positive depression screen finding.

Record your efforts

The identifiers and descriptors for each organization's coverage used to define members' eligibility for measure reporting. Allocation for reporting is based on eligibility during the participation period:

- 28 days prior to the delivery date through the delivery date
- A pregnancy episode in which the delivery date occurs during the measurement period

A standard assessment instrument that has been normalized and validated for the appropriate patient population. Eligible screening instruments with thresholds for positive findings include:

Instruments for adolescents (≤ 17 years)	Total Score LOINC Codes	Positive finding
Patient Health Questionnaire (PHQ-9)®	44261-6	Total score ≥ 10
Patient Health Questionnaire Modified for Teens (PHQ-9M)®	89204-2	Total score ≥ 10

Clinically Useful Depression Outcome Scale (CUDOS)	90221-3	Total score ≥ 31

¹ Brief screening instrument. All other instruments are full-length.

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.
- Deliveries that occurred at less than 37 weeks gestation.

Notes:

² Proprietary; may be cost or licensing requirement associated with use.

Prenatal Immunization Status (PRS-E)

This measure assesses the percentage of deliveries in the measurement period (January 1 to December 31) in which women had received influenza and tetanus, diphtheria toxoids, and acellular pertussis (Tdap) vaccinations.

Record your efforts

The identifiers and descriptors for each organization's coverage used to define members' eligibility for measure reporting. Allocation for reporting is based on eligibility during the participation period:

- 28 days prior to the delivery date through the delivery date
- A pregnancy episode in which the delivery date occurs during the measurement period

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.
- Deliveries that occurred at less than 37 weeks gestation

lotes:	

Social Need Screening and Intervention (SNS-E)

This measure asses the percentage of members who were screened, using prespecified instruments, at least once during the measurement period for unmet food, housing and transportation needs, and received a corresponding intervention if they screened positive:

- Food Screening. The percentage of members who were screened for food insecurity.
- **Food Intervention.** The percentage of members who received a corresponding intervention within one month of screening positive for food insecurity.
- **Housing Screening.** The percentage of members who were screened for housing instability, homelessness or housing inadequacy.
- **Housing Intervention.** The percentage of members who received a corresponding intervention within one month of screening positive for housing instability, homelessness or housing inadequacy.
- **Transportation Screening.** The percentage of members who were screened for transportation insecurity.
- **Transportation Intervention.** The percentage of members who received a corresponding intervention within one month of screening positive for transportation insecurity.

Record your efforts

- **Food insecurity:** Uncertain, limited, or unstable access to food that is: adequate in quantity and in nutritional quality; culturally acceptable; safe and acquired in socially acceptable ways.
- **Housing instability**: Currently consistently housed but experiencing any of the following circumstances in the past 12 months: being behind on rent or mortgage, multiple moves, cost burden or risk of eviction.
- **Homelessness:** Currently living in an environment that is not meant for permanent human habitation (for example,, cars, parks, sidewalks, abandoned buildings, on the street), not having a consistent place to sleep at night, or because of economic difficulties, currently living in a shelter, motel, temporary or transitional living situation.
- Housing inadequacy: Housing does not meet habitability standards.
- **Transportation insecurity:** Uncertain, limited or no access to safe, reliable, accessible, affordable, and socially acceptable transportation infrastructure and modalities necessary for maintaining one's health, well-being, or livelihood.

¹ Proprietary; may be cost or licensing requirement associated with use.

Note: The SNS-E screening numerator counts only screenings that use instruments in the measure specification as identified by the associated LOINC code (s). Allowed screening instruments and LOINC codes for each social need domain are listed above.

- Members who use hospice services or elect to use a hospice benefit any time during the measurement year.
- Members who die any time during the measurement year.

Appendix

Coding for ECDS measures

There are many approved NCQA codes used to identify the services included in the measures listed below. The following are just a few of the approved codes. Please see the NCQA website for a complete list https://www.ncqa.org/.

Patient care opportunities

You can find patient care opportunities within the Patient360 application located on Availity Essentials Payer Spaces. To access the Patient360 application you must have the Patient360 role assignment. From Availity's home page select Payer Spaces, then choose the health plan from the menu. Choose the Patient360 tile from the Payer Space Applications menu and complete the required information on the screen. Gaps in care are located in the Active Alerts section of the Member Summary.
