

Maternal cardiovascular health

How to differentiate normal from problematic

| |  Routine care Offer reassurance |  Caution Non-emergent evaluation |  Stop Prompt evaluation |
|--|---|--|---|
| Risk factors (see list on back) | Absent/mild | Present | Present |
| History of cardiovascular disease | None | Yes | Yes |
| Self-reported symptoms | None or mild | Yes | Yes |
| Shortness of breath | No interference with daily activities, with heavy exertion only | With moderate exertion, new onset asthma, persistent cough, or moderate to severe OSA | At rest, paroxysmal nocturnal dyspnea, bilateral chest infiltrates on CXR |
| Chest pain | Reflux related that resolves with treatment | Atypical | At rest or with minimal exertion |
| Palpitations | Few seconds, self-limited | Brief, self-limited episodes, no lightheadedness or syncope | Associated with near syncope |
| Syncope | Dizziness only with prolonged standing or dehydration | Vasovagal | Exertional or unprovoked |
| Fatigue | Mild | Mild to moderate | Extreme |
| Vital signs | Normal | Abnormal | Abnormal |
| Pulse (beats per minute) | < 90 | 90 to 119 | > 120 |
| Systolic BP | No/rarely | Yes | Yes |
| Respirations (per minute) | 12 to 15 | 16 to 25 | > 25 |
| Oxygen saturation | > 97% | 95 to 97% | < 95% (unless chronic) |
| Physical exam | Normal | Abnormal | Abnormal |
| Jugular vein distention (JVD) | Not visible | Not visible | Visible > 2 cm above clavicle |
| Heart | S3, barely audible soft systolic murmur | S3, systolic murmur | Loud systolic murmur, diastolic murmur, S4 |
| Lungs | Clear | Clear | Wheezing, crackles, effusion |
| Edema | Mild | Moderate | Marked |

Risk factors for maternal cardiovascular disease:

- Mother is older than 35
- Mother is Black and non-Hispanic
- Mother has obesity
- Presence of a hypertensive disorder in pregnancy (preeclampsia, eclampsia, HELLP syndrome)
- Presence of chronic hypertension
- Presence of diabetes mellitus and gestational diabetes
- Mother has substance use disorder (in other words, uses alcohol, cocaine, methamphetamines)
- Mother uses tobacco
- Strong family history of cardiovascular disease
- History of coronary artery dissection
- IUGR < 5%
- History of placental abruption
- Blood transfusion postpartum
- Peripartum infection

Healthy Blue is a Medicaid product offered by Missouri Care, Inc., a MO HealthNet Managed Care health plan contracting with the Missouri Department of Social Services. Healthy Blue is administered statewide by Missouri Care, Inc. and administered in the Kansas City service region by Missouri Care, Inc. in cooperation with Blue Cross and Blue Shield of Kansas City. Missouri Care, Inc. and Blue Cross and Blue Shield of Kansas City are both independent licensees of the Blue Cross and Blue Shield Association.
